

Checklist Light Configurations

Ledlight Group (LLG) offers light configurations as part of our sales & marketing service. Combining the latest design software with more than a decade of LED light configuring experience (CrystalLed™) ensures a LED light solution that is unique and tailored to customer needs and specific projects.

<]] \ `Tower applications

In order to provide the best possible solution, the following information is required from the customer:

- Drawings or images of defined area (PDF / TIFF / JPG)
 - EN – standards for lighting the application / area
 - Other Lux level requirements
 - Height, position and number of poles / masts / cranes
 - Mounting area on pole / mast / crane
 - Surroundings (Buildings, roads with lights that may influence lux level etc.)
 - Other health and safety requirements
 - Main purpose of light (working light, security light etc.)
 - Surrounding areas that may be affected negatively by glare from the tower light
 - Other elements that will influence the light level and uniformity. Please specify:
-
