

Technical Correction

There has been a labelling issue with the 450 mA LLG drivers manufactured in the period January 2011 to July 2013.

The following products have been partially mislabelled:

CrystalLed™ driver 230/450 – 24, 48, and 72 LED
CrystalLed™ ID driver 230/450 – 24, 48 and 72 LED

The NEMKO certification was wrongly printed on the label. This does not affect the functionality, safety or the guaranteed performance of the drivers. The drivers are in compliance with EC (European Conformity).

For any further questions, contact Tor A. Birk, Product Development Director.
